JOHNS HOPKINS ALL CHILDREN’S HOSPITAL
APP – Hemostasis and Thrombosis Practitioner and Program Coordinator

Johns Hopkins All Children’s Hospital in Saint Petersburg, Florida is excited to announce the opening for a Hemostasis and Thrombosis Practitioner and Program Coordinator APP. The APP position will be licensed in the state of Florida as an Advanced Registered Nurse Practitioner or Physician’s Assistant responsible for the coordination and direct patient care of all patients with hemostasis and thrombosis related conditions being treated at Johns Hopkins All Children’s Hospital. This is a chance to be part of the team building the Cancer and Blood Disorders Institute at Johns Hopkins All Children’s Hospital. The Cancer Program at JHACH is currently ranked #50 by US News & World Report and with the start of the new Associate Director for the Cancer & Blood Disorders Institute, Dr. Peter Shaw, we anticipate we will be ranked even higher next year.

The APP-Hemostasis and Thrombosis Practitioner and Program Coordinator is responsible for the coordination of clinical care for patients seeking care for hemostasis and thrombosis related medical conditions. The coordinator is responsible for working with multiple internal and external customers including organizations to achieve the goals consistent with the medical care of these patients. The APP-Hemostasis and Thrombosis Practitioner and Program Coordinator possesses a strong pediatric clinical skillset as evident by the delivery of clinical care plans with appropriate autonomy and supervision by physician-leaders of the program.

Minimum Position Qualifications:
Education: Graduate of an approved Nurse Practitioner or Physician’s Assistant Program
Experience: Pediatric Clinical experience, with preference toward pediatric clinical experience beyond that which is limited to education/training programs
Certifications/Licenses: Current national certification as a Nurse Practitioner or Physician’s Assistant
Knowledge, Skills, and Abilities:
Auditory and visual ability to assess and provide nursing care.
Ability to effectively interact with patients, families, physicians, ancillary and support staff.
Ability to effectively manage with an environment of emotional and physical stress.
Ability to move about the hospital campus.
Ability to perform physical activity including, but not limited to: repetitive motions, feeling, grasping, fingering (pinching, typing, handling, etc.), lifting, pulling, pushing, walking, standing, reaching, crouching, and stooping.
Knowledge of theories and techniques for teaching / learning, change, leadership and administration.

Interested applicants are welcome to submit resumes to: Laurel.McDevitt@jhmi.edu.
