**Recipient of HTRS/Novo Nordisk 2018 Clinical Fellowship Award  
in Hemophilia and Rare Bleeding Disorders**

**Genevieve C. Moyer, MD, MSCS**

**Fellow, Hematology/Oncology**

**University of Colorado, Denver; University of Colorado Hemophilia & Thrombosis Center**

**Mentor: Tyler W. Buckner, MD, MSc    Co-Mentor: Marilyn Manco-Johnson, MD**

Dr. Moyer completed medical school, Internal Medicine residency and chief residency at Saint Louis University before moving to the University of Colorado for her Hematology/Oncology Fellowship in 2015. There, she pursued cancer-associated thrombosis and has been working with the department of bone marrow transplantation to identify best approaches to prophylaxis and treatment of venous thromboembolism in this population. In her second year of fellowship, Dr. Moyer launched a benign hematology clinic at Denver's safety net hospital where she established a niche caring for women with bleeding and clotting disorders. She continues to work with the department of maternal and fetal medicine to optimize the multidisciplinary care of women with bleeding disorders at the University of Colorado. She also continues to evaluate the ability of lab assays such as thromboelastography to predict clinical outcomes in patients who are at risk for both bleeding and thrombosis.
