

This educational course and U.S. attendee travel, lodging and registration is supported by Octapharma and the course is offered in collaboration with the Malmö Centre for Thrombosis and Haemostasis, Lund University, and Skåne University Hospital

ITI School in Hemophilia 2020 Award Recipient

Lynn Malec, MD, MS, Assistant Professor

Versiti Blood Research Institute

Mentor: Gilbert C. White, II, MD

Course Title: “ITI School in Hemophilia” in Malmö, Sweden

Dr. Lynn Malec received her undergraduate and medical school degrees from the University of Wisconsin, and went on to complete a residency in Internal Medicine and Pediatrics followed by a Pediatric Hematology/Oncology fellowship at the University of Pittsburgh/Children’s Hospital of Pittsburgh. Currently, Dr. Malec is an Associate Investigator at the Versiti Blood Research Institute and Assistant Professor of Medicine and Pediatrics at the Medical College of Wisconsin.

She serves as the Medical Director of the Comprehensive Center for Bleeding Disorders at Versiti. She is actively engaged in the care and research involving both adults and kids with hemophilia and other bleeding and clotting disorders; her specific area of clinical research is focused on inhibitors in hemophilia and the impact of new factor products. Dr. Malec found the ITI School in Hemophilia to be a very valuable experience and left with a deeper understanding of the possible immunologic underpinnings of inhibitor formation and eradication. She also left with a desire to improve collaborative clinical research in the area of immune tolerance.
