The Aflac Cancer and Blood Disorders Center of Emory University School of Medicine and Children’s Healthcare of Atlanta is seeking a mid-career investigator with basic or clinical research interests in thrombosis, to join one of the premier hemostasis and thrombosis research programs in the country. The successful candidate will join a rapidly expanding comprehensive hemostasis and thrombosis program in the Department of Pediatrics. We are seeking candidates with a strong research base to join a group of investigators with interests in platelet membrane glycoprotein structure and function, vascular biology, blood coagulation factor structure and function, hemophilia gene therapy, hemophilia, von Willebrand disease, and factor VIII inhibitors. In addition, there are collaborative efforts on-going with transfusion medicine, interventional radiology and cardiology. There is a strong financial base for future success supported by federal funds (NIH/NHLBI), philanthropy, non-profit organizations (Hemophilia of Georgia (hemostasis clinical care/research only), National Hemophilia Foundation, Hemostasis/Thrombosis Research Society, Children’s Healthcare of Atlanta) as well as corporate support (Aflac and the pharmaceutical industry).

Job Description

Assistant/Associate Professor of Pediatrics, Division of Hematology/Oncology, Department of Pediatrics, Aflac Cancer and Blood Disorders Center, Children’s Healthcare of Atlanta

As a member of the Division of Hematology/Oncology in the Department of Pediatrics focused on Hemostasis/Thrombosis, you would be expected to:

- Lead the thrombosis program which currently includes a junior faculty member focusing on thrombosis, 2 Nurse Practitioners and shared research coordinators;
- Demonstrate a pattern of excellence and ongoing contributions in clinical medicine, as well as teaching and research;
- Provide exemplary clinical service and assure that patients cared for by you receive only the highest quality care
- Devote significant effort to outpatient and inpatient clinical responsibilities, depending upon research interests and funding, divided among the Aflac Clinics and inpatient facilities at Children's Healthcare of Atlanta.
Atlanta. The location and ratio of inpatient to outpatient clinical work may be adjusted somewhat depending upon service needs.

- In collaboration with program leaders, contribute to and expand the clinical program and patient services in Hemostasis/Thrombosis particularly in collaboration with the Interventional Radiology and Cardiology

- Play a role in the education and training program of the pediatric Hem/Onc/BMT Division, including access to and involvement with medical students, residents, fellows, and occasionally physicians in practice;

- Continue to develop and expand a record of research excellence and publications under the mentorship of senior Hematology faculty;

- Collaborate with other members of Children's Healthcare of Atlanta and Emory University Department of Pediatrics, especially in the Aflac Cancer and Blood Disorders Center, in building multidisciplinary clinical and research projects; and

- Participate in periodic reviews of your activities to be performed by Dr. Clinton Joiner, Director of the Hematology Program of the Aflac Cancer and Blood Disorders Center.

Please direct inquiries with a CV to Clinton H. Joiner, MD, PhD, Professor and Director, Hematology Program, Aflac Cancer and Blood Disorders Center, 2015 Uppergate Drive, Rm 436, Atlanta, GA, 30322.
