

## **Academic Faculty Position in Benign Hematology: Johns Hopkins Division of Hematology**

The Johns Hopkins Division of Hematology is recruiting a full-time adult benign hematology faculty member on the Clinical Investigator or Clinician Educator Track to join our growing division. We are looking for a junior or mid-career hematology-trained candidate who has a particular interest in clinical benign hematology. As one of the few remaining, free-standing hematology programs in the country, Hopkins offers a unique environment for interested candidates to work with stellar hematology faculty and fellows with a passion for benign hematology. We currently have robust clinical and research programs in hemostasis-thrombosis, myeloproliferative neoplasms, bone marrow failure disorders, thrombotic microangiopathies, and sickle cell disease, and are interested in both building on existing programs as well as creating new career paths. In addition, our clinical program is designed specifically for benign hematologists with an interest in medical education.

Candidates will have the opportunity to work with dedicated hematology fellows on the benign hematology inpatient ward, inpatient consult service, and outpatient clinic. Our division works closely with laboratory medicine, transfusion medicine, and hematopathology, so that we can provide a multi-disciplinary approach to hematology care.

Interested candidates should send their CV, brief statement of clinical and/or research interests, and names and email addresses of three references to Rakhi Naik, MD MHS, at [rakhi@jhmi.edu](mailto:rakhi@jhmi.edu).
