

**Faculty Physician**  
**Medical Hematologist/Oncologist - Benign Hematology**  
*Minneapolis, MN*

The University of Minnesota and Department of Medicine (Hematology, Oncology, and Transplantation Division) is seeking candidates with an interest in benign hematology to expand our already robust section of 6 dedicated faculty in the Benign Hematology Program. You will join a collaborative and diverse team of senior hematologists with international reputations as clinical and research experts and junior faculty who are emerging leaders in their field.

The Benign Hematology Program at University of Minnesota is a major referral center with expertise in the care of patients with numerous types of non-malignant hematologic diseases, including hemophilia, bleeding and thrombotic disorders, platelet disorders, anemia, iron disorders, complement disorders (PNH and aHUS), sickle cell disease and hemoglobinopathies, thalassemias, porphyria, immunodeficiency, leukocyte disorders, histiocytic diseases, and other rare conditions. Our Benign Hematologists provide care to patients with non-malignant hematological disorders in both the inpatient and outpatient setting. In addition, they participate in teaching, research, and clinical trials. Our facilities include a modern 400-bed teaching hospital, outpatient Clinics and Surgical Center and the Center for Bleeding and Clotting Disorders, and extensive basic research facilities and clinical research office. For more than 40 years we have been dedicated to providing excellent care for bleeding and thrombotic disorders at The Center for Bleeding and Clotting Disorders. Our center is the largest in the state and one of the oldest in the country. With a dedicated team for regulatory support and research coordination, recent investments have been made to continue our robust clinical trial infrastructure including experience in gene therapies. As part of the federally funded Hemophilia Treatment Center nationwide network, we are able to offer comprehensive care that meets each patient's needs.

Significant opportunities for faculty development and mentoring for research, education of students, residents, fellows and advanced practice providers, and clinical trial leadership are provided by senior faculty and a critical mass of diverse non-malignant hematologists.

Applicants with experience in disorders of hemostasis/thrombosis disorders, hemoglobinopathies, developmental therapeutics, and/or innovative clinical trial design are particularly encouraged to apply. Fellows completing their training with an interest in hematology will also be considered.

Qualifications

- M.D. or D.O. and Board Eligible or Certified in Hematology
- Must have or be able to attain a medical license in the state of MN
- Must be able to pass credentialing at all applicable sites

*Applicants must have the ability to receive work authorization in the United States from the U.S. Citizenship and Immigration Services and maintain legal status according to the requirements of VISA category while in the United States.*
