

Assistant Faculty - Hematology

Summary

St. Jude Children's Research Hospital, a private not-for-profit institute, is a world-renowned institution that requires a superior, diverse, and well-trained group of clinicians, researchers, postdoctoral fellows, administrators, and information technology specialists. St. Jude is engaged in the ongoing expansion of its facilities, as well as patient care and scientific research activities in the field of hematology. The facilities and salaries are competitive and a generous benefit package is included.

Responsibilities

The Department of Hematology has available faculty positions at all levels to participate in patient care and clinical/translational research in the field of pediatric sickle cell disease, thrombosis/coagulation, bone marrow failure and general hematology. New faculty members will have an excellent environment and sufficient resources in which to perform patient care, conduct clinical and translational research and to collaborate with investigators in various biomedical fields. St. Jude has a highly successful pediatric hematology/oncology fellowship program and physician-scientist training programs. Associations with the University of Tennessee Health Sciences Center and the Department of Pediatrics at LeBonheur Children's Hospital provide opportunities for research collaborations, as well as teaching students and residents.

Minimum Education

Candidates should have an MD (or equivalent) degree, have completed a pediatric hematology-oncology fellowship program at an accredited training program and be board-certified or board-eligible in pediatric hematology/oncology.

Minimum Experience

Successful candidates will have demonstrated clinical competency and research accomplishments in the area of non-malignant pediatric hematology.
