The Department of Pediatrics at Weill Cornell Medicine is seeking a BC/BE pediatric hematologist-oncologist to join the Division of Pediatric Hematology/Oncology at the level of Assistant Professor. Successful candidates should have an interest in general hematology/oncology and patient oriented research. The candidate will join a growing clinical program that consists of 6 faculty members, 4 nurse practitioners/physician assistants, two social workers, dedicated child life, and support staff. Responsibilities will include outpatient and inpatient clinical care, research and scholarly activities, and teaching all levels of trainees. The Division has comprehensive programs in pediatric oncology, thrombosis and hemostasis, thalassemia and red cell disorders, and platelet disorders, and practice in state-of-the-art facilities at New York Presbyterian-Weill Cornell.

Please send CV to:

Sujit Sheth, MD
