RESEARCH AWARD

HTRS/ATHN 2017 DREAM Award Recipient

Kristina M. Haley, DO, MCR

Assistant Professor

Oregon Health & Science University

Mentor: Michael Recht, MD, PhD Co-Mentor: Roshni Kulkarni, MD

Project Title: "ATHENA1: Characterizing the impact and treatment of reproductive tract bleeding on women with bleeding disorders"

Collaborators: Shirley Abraham, MD, University of NM and Robert F. Sidonio, Jr, MD, MSc, Emory University

Kristina graduated with a B.S. degree from the University of Puget Sound in 2003. She graduated from the Chicago College of Osteopathic Medicine in 2007 and completed her residency in Pediatrics at Advocate Lutheran General Children's Hospital in 2010. Fellowship brought her back to the Pacific Northwest, and she completed her Pediatric Hematology/Oncology Fellowship in 2013 at Oregon Health & Science University (OHSU). Dr. Haley joined the faculty at OHSU in the Department of Pediatrics/Division of Pediatric Hematology/Oncology and The Hemophilia Center as an Assistant Professor in 2013. ATHENA1 is a collaborative effort aimed at defining the phenotype and treatment of women with bleeding disorders first through increasing the number of women included in the ATHN dataset and then second through enrichment of the dataset with reproductive tract bleeding data, treatment data, and quality of life data. By enriching the dataset, ATHENA1 will improve our understanding of bleeding disorders in women. Further, ATHENA1 will be a hypothesis generating project, creating a platform for future women focused ATHN studies.
