## HTRS 2017 Mentored Research Award Recipient

**Sol Schulman, MD, PhD**

**Hematology/Oncology Fellow**

**Beth Israel Deaconess Medical Center/Harvard Medical School**

**Mentor: Bruce Furie, MD**

**Co-Mentor: Robert Flaumenhaft, MD, PhD**

**Project Title: “Role of Protein Disulfide Isomerase in Prothrombin Activation”**

Dr. Sol Schulman is a hematology-oncology fellow at the Beth Israel Deaconess Medical Center and Harvard Medical School. After receiving B.S. and M.S. degrees in biochemistry from Brandeis University, he earned his M.D. and Ph.D. degrees in the joint Harvard – MIT Medical Scientist Training Program. His Ph.D. thesis research provided important insights into human vitamin K metabolism and the mechanisms of warfarin resistance. He subsequently completed internal medicine residency training at the Brigham and Women’s Hospital in Boston. He is now a fellow under the mentorship of Dr. Bruce Furie and Dr. Robert Flaumenhaft. Dr. Schulman’s current research focuses on the role of protein disulfide isomerase in prothrombin activation in an effort to ultimately exploit protein disulfide isomerase as a hemostatic agent.
