HTRS/Novo Nordisk 2017 Mentored Research Award in Hemophilia and Rare Bleeding Disorders Recipient

Angela Weyand, MD

Assistant Professor

University of Michigan

Mentor: Jordan A. Shavit, MD, PhD

Project Title: "Identification of genetic modifiers of coagulation disorders using a factor V deficient background"

Dr. Angela Weyand is an Assistant Professor of Pediatric Hematology and Oncology at The University of Michigan C.S. Mott Children's Hospital. She is a native of Kansas City, Kansas and a graduate of Northwestern University in Evanston, Illinois. Dr. Weyand attended medical school at the University of Michigan, completed her pediatrics residency at the University of Washington/Seattle Children's Hospital and returned to the University of Michigan for her pediatric hematology and oncology fellowship. Through the HTRS mentored research award, she will continue her research investigating genetic modifiers of coagulation in a zebrafish model. Dr. Weyand will train under the mentorship of Dr. Jordan Shavit, a former HTRS mentored research awardee. Dr. Weyand's long term goals are to further the field of coagulation through translational research and to provide the highest level of comprehensive clinical care to patients with hemophilia and coagulation disorders.
