VWD Program 2020 Award Recipient

**Neha Bhasin, MD, Assistant Professor of Pediatrics
Director, Arizona Pediatric Hemophilia Thrombosis Center
University of Arizona**

Mentor: Steven R. Lentz, MD, PhD

Course: "Von Willebrand Disease – From Theory to Clinical Practice," Malmö, Sweden

Dr. Neha Bhasin received her Bachelor's of Science Degree in Physiological Sciences from the University of California, Los Angeles and her medical degree from Ross University School of Medicine. Dr. Bhasin completed her residency training in Pediatrics at Stony Brook University Medical Center and her fellowship training at University of Iowa. She received a certificate in Clinical and Translational Research at the University of Iowa. As a pediatric hematologist/oncologist,

she specializes in the care of hemostasis, thrombosis, red cell disorders and hemoglobinopathies. She leads the comprehensive Bleeding Disorder, Women with Blood Disorders, Thrombosis and Sickle Cell clinics as Director of the Arizona Pediatric Hemophilia Thrombosis Center. She is involved in clinical research focusing on thrombosis under the mentorship of Dr. Steven Lentz. Her goals for the Malmö course include expanding her knowledge of von Willebrand Disease, learning about the laboratory tests involved in making this diagnosis and expanding her knowledge about interpretation of different studies in order to make the correct diagnosis.
