

This educational course and U.S. attendee travel, lodging and registration is supported by Octapharma and the course is offered in collaboration with the Malmö Centre for Thrombosis and Haemostasis, Lund University, and Skåne University Hospital

Malmö Course 2019 Award Recipient

**Ming Y. Lim, MBBCh, MScR, Assistant Professor
University of Utah**

Mentor: George Rodgers, MD, PhD

Course Title: “Von Willebrand Disease – From Theory to Clinical Practice”

Recipient: 2015 HTRS/ATHN DREAM Award, 2018 HTRS Mentored Research Award

Dr. Ming Y. Lim received her medical degree at Cambridge University, England. After working for the NHS for two years, she pursued her residency in internal medicine at Mayo Clinic Rochester. She then completed her fellowship in hematology/oncology at University of North Carolina at Chapel Hill, focusing on hemostasis and thrombosis. During fellowship, she learned to provide care to VWD patients at the University of North Carolina Hemophilia Treatment Center.

In her first faculty position at the Medical University of South Carolina, she specialized in congenital bleeding disorders, receiving clinic referrals across South Carolina on the diagnosis and management of VWD patients. Currently, she is the Associate Director for the Utah Center for Bleeding & Clotting Disorders at the University of Utah, where her clinical practice involves providing comprehensive care to adults with bleeding disorders throughout Utah. Her goals for the Malmö course are to improve her skills in the evaluation of VWD and to apply evidence-based treatment strategies into clinical practice. She is looking forward to learning and sharing with her peers the best possible practices in optimizing patient care.
